# THE

BOROUGH OF GLASTONBURY.

ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH FOR THE YEAR  
ENDED 31ST DECEMBER, 1968

Tel: Wells 3379 (Office)  
Wells 2643 (Residence)

Area Health Department,  
St. Lawrence Lodge,  
37 Chamberlain St.,  
WELLS.  
BA5 2PQ.

11th November, 1969.

To The Mayor, Aldermen and Councillors of  
the Glastonbury Borough Council.

Mr. Mayor, Aldermen and Councillors,

I beg to present the Annual Report on the Health of the Borough for 1968, compiled in accordance with the instructions of the Department of Health and Social Security which came into being in November of last year.

1968 also saw the move of the Area Health Department from Shepton Mallet to more suitable premises in Wells with a correspondingly greater ease of access to the citizens of Glastonbury.

The vital statistics show a drop in the Live Birth Rate to a figure lower than County or National averages but on the other hand the Still Birth Rate was similarly lower and live births exceeded deaths. There was an increase in mortality, particularly amongst infants but the Corrected Death Rate did not exceed the National figure and there was no maternal mortality.

Notifiable diseases were again few in number and there were no outbreaks of major infectious diseases. Outbreaks of disease in cattle transmissible to humans took up a certain amount of the time of your Public Health Department and in one case it was necessary to apply a Heat Treatment Order to a dairy herd. Visits to the elderly were again very necessary and a Removal Order was required in one case on the request of a general practitioner.

My thanks are due to the Public Health Inspector and his staff for the report on the environmental health of the Borough and co-operation at all times, also to the Town Clerk, fellow Officers and Members of the Council for their continued support.

I have the honour to be,

Your obedient servant,

D. E. CLARE.

Medical Officer of Health.

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion. The number of people aged 65 and over is expected to increase from 250 million to 450 million. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion.

## NOTES ON VITAL STATISTICS FOR 1968.

(Although as a general rule the figures are too small for much significance to be attached to them, nevertheless certain broad statements can be made).

### Population

An increase of 60 over the population for the previous year was estimated by the Registrar-General, and births exceeded deaths by 13.

### Births.

Live Births - showed a decrease of 14 compared with the previous year, but the total of Illegitimate births (6) was the same. The Corrected Birth Rate fell to a figure lower than the County and National averages, but the percentage of illegitimate births closely approximated the County figure.

Still Births - it will be seen that 1 occurred in the Borough and the Still Birth Rate was appreciably lower than County or National Rates.

### Deaths.

All Ages totalled 4 more than in 1967, giving once again a Corrected Death Rate Higher than the County average but approximating the National one.

Infant Deaths. - rose to 6, all within the first week of life, and high Infant, Neonatal, Early Neonatal and Perinatal Mortality Rates therefore result.

Maternal Mortality - it is a pleasure to record that there was none again during the year.

### Causes of Death

Cardio-Vascular and Cerebro-Vascular Diseases with 44 deaths took leading place again as the cause of mortality in the Borough 3 more than in 1967. 30 of these deaths were caused by Ischaemic and Other Heart Diseases whilst Cerebrovascular and Other Diseases of the Circulatory System accounted for 14, 11 in women.

Cancer Deaths fell by 4 to 9 deaths and as regards site, lung cancer led with 4 deaths, followed by breast cancer with 2 deaths and stomach with 1.

Respiratory Diseases - totalled 5, with a decrease of 4 compared with the previous year. Of these, pneumonia accounted for 4, all above 55 years of age.

Accidents. - deaths from these (3) totalled 2 less than in 1967. Two of these deaths involved a motor vehicle.

Birth Injury and Difficult Labour caused 5 out of the 6 Infant deaths.

NOTIFIABLE DISEASES.

It will be seen from the 5-year Table that there is little on which to comment.

ANNUAL RETURN OF FOOD POISONING AND SALMONELLA INFECTION.

No cases of food poisoning or human salmonella infection were notified during the year in the Borough.

NATIONAL ASSISTANCE ACT, 1948 (Sec.47) AND AMENDMENT ACT, 1951.

In August a message was received from a Glastonbury General practitioner, that an elderly widow patient of his, suffering from advanced cancer and living on her own in a state of neglect, was urgently in need of hospital treatment which she refused to accept.

An immediate visit to the home confirmed the deplorable living conditions and lack of care reported. Accordingly, in conjunction with the family doctor, an Order under the 1951 Amendment Act was applied for from a local Justice of the Peace and two days later the patient was removed by ambulance to Trinity Hospital, Taunton, for care and attention. This action was followed up by a successful application to the Magistrates Court on 17th September for a further three months extension of the Order.

The Patient was well looked after in hospital but on 20th October died there of her original condition

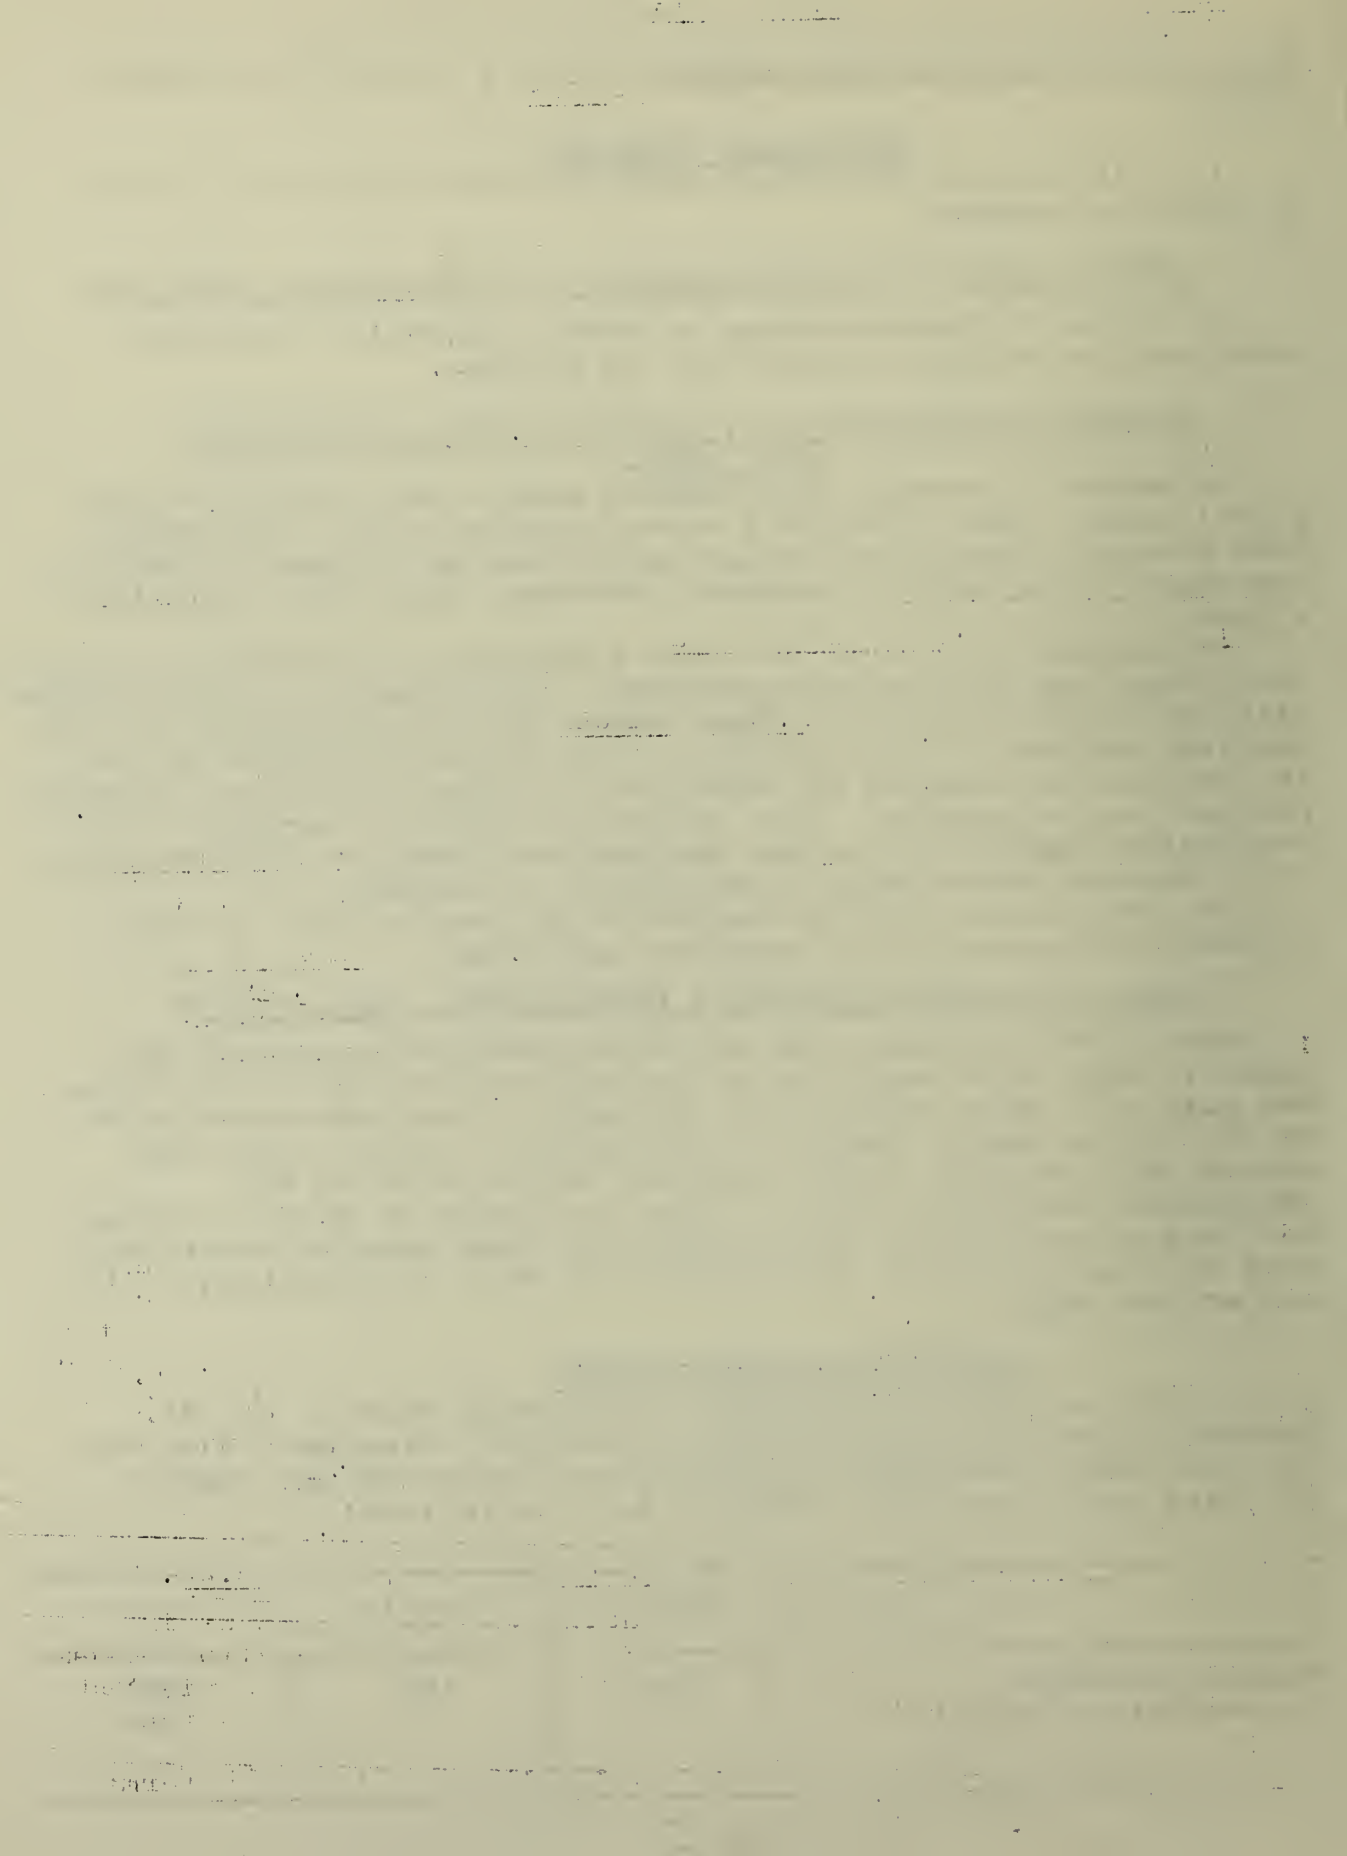

MILK AND DAIRIES (GENERAL) REGULATIONS, 1959, Sec.20.

Notice was received from the County Health Department in August, 1968, that brucellosis had been isolated on culture from the milk of a dairy herd in the district. The farm was visited by the Public Health Inspector and myself, and as it was the source of a sizeable retail business in raw milk in the Glastonbury and Street area, it was necessary to serve a formal Heat Treatment Notice. As no effort had been made to clear the herd of this infection, the Notice was still in operation at the end of the year.

MASS RADIOGRAPHY SERVICE

Visits were paid by the Mass Radiography Unit to the St. Dunstan's Car Park at fortnightly intervals throughout the year for the benefit of General Practitioner Cases and the number of these cases was 147. Results were as follows:-

	Male	Female	Total
Numbers examined.	206	163	369
Abnormalities detected	7	9	16

DETAILS OF ABNORMALITIES DETECTED

Since the War, up to the end of 1968 a total of 473 new dwellings have been completed by the Local Authority, 428 by Private Enterprise and 70 units of accommodation have been provided by conversion, adaptation, or reconstruction, and three units of accommodation have been lost, one conversion into business premises and two by conversion of two houses into one to accommodate large families, making provision for 971 families in all.

Up to the end of 1968 action has been taken under Section 16 of the Housing Act, 1957, in respect of 129 houses, and in all Cases the Owners gave written undertakings in accordance with the Act not to relet them for human habitation when they became vacant. At the end of the year two of these dwellings remained occupied. Five have been reconstructed and brought back into use as dwellings. Eighty-seven houses have been demolished and fifteen houses have been purchased by Agreement and demolished in connection with the Redevelopment of Hill Head Area. Three houses in Old Wells Road have been acquired and demolished, where action had been taken under the Housing Acts.

## IMPROVEMENT GRANTS.

### (a) Discretionary

Number of applications and houses dealt with by Local Authority during year:-

(1) Received.		(2) Approved.	
Applications	Number of Dwellings.	Applications	Number of Dwellings.
Two	Three	Two	Three

NOTE - Number of applications approved in respect of owner/occupiers during year. One .....

Average cost per dwelling approved during year. £400 .....

Amount of grant payable by Local Authority. 50% .....

subject to  
maximum of £500 per  
dwelling.

### (b) Standard

1. Number of applications (a) Received..... Eight
- (b) Approved..... Eight
2. Number of houses where standard amenities have been provided. One and Seven in hand.....

NOTE - Number of applications approved in respect of owner/occupiers during year..... Eight.....

Since the 31st July, 1949, up to the end of 1968, 92 applications had been received and approved in respect of Discretionary Improvement Grants, two applications received and rejected and 71 applications in respect of Standard Grants had been received and approved and one application received and rejected. Thirty-one dwellings had been gained as a result of the conversion of large houses or buildings into flats.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is crucial for the company's financial health and for providing transparency to stakeholders. The text also mentions the need for regular audits to ensure the integrity of the data.

2. The second part of the document outlines the various methods used to collect and analyze data. It includes a detailed description of the survey process, which involved distributing questionnaires to a large number of participants. The results of the survey are presented in a series of tables and graphs, showing a clear trend towards improved performance over time.

3. The third part of the document focuses on the implementation of the findings from the survey. It describes the various initiatives that have been put in place to address the identified issues, such as the introduction of new training programs and the restructuring of the organization. The text also mentions the ongoing monitoring and evaluation of these initiatives to ensure their effectiveness.

4. The fourth part of the document provides a summary of the key findings and conclusions. It highlights the significant improvements in efficiency and productivity that have been achieved as a result of the implemented changes. The text also mentions the challenges that have been encountered and the steps that are being taken to address them.

5. The fifth part of the document contains a list of references to the various sources of information used in the study. This includes books, articles, and other documents that have been consulted to support the analysis and conclusions.

6. The sixth part of the document is a list of appendices, which include additional data and information that is not included in the main body of the report. These appendices provide a more detailed look at the survey results and the implementation process.

7. The seventh part of the document is a list of figures and tables, which are used to present the data in a clear and concise manner. These include line graphs, bar charts, and tables of data. The figures and tables are designed to be easy to read and to provide a visual representation of the information.

8. The eighth part of the document is a list of footnotes, which provide additional information and clarification for the text. These footnotes are used to explain the methodology used in the study and to provide references to the sources of information.

9. The ninth part of the document is a list of acknowledgments, which thank the various individuals and organizations that have provided support and assistance throughout the project. This includes the company's management, the survey participants, and the research team.

10. The tenth part of the document is a list of the authors' contact information, which includes their names, titles, and addresses. This information is provided so that readers can contact the authors if they have any questions or comments.

11. The eleventh part of the document is a list of the authors' biographies, which provide a brief overview of their professional backgrounds and research interests. This information is included to provide context for the study and to establish the authors' credibility.

12. The twelfth part of the document is a list of the authors' publications, which includes a list of the articles and books that they have written. This information is included to provide a more complete picture of the authors' work and to show their expertise in the field.

13. The thirteenth part of the document is a list of the authors' affiliations, which includes the names of the organizations and institutions that they are currently associated with. This information is included to provide a more complete picture of the authors' professional lives and to show their current involvement in the field.

14. The fourteenth part of the document is a list of the authors' contact information, which includes their names, titles, and addresses. This information is provided so that readers can contact the authors if they have any questions or comments.

15. The fifteenth part of the document is a list of the authors' acknowledgments, which thank the various individuals and organizations that have provided support and assistance throughout the project. This includes the company's management, the survey participants, and the research team.
